Superintendent.

GOVERNMENT OF INDIA

Ministry of Works Mines and Power.

No. M.II-155(110) Dated New Delhi, the 14th August 1950.

From

Shri. M.M. Malhotra,
Assistant Secretary to the Government of India.

To

All State Governments(except Hyderabad, Mysore, Travancore-Cochin, and Jammu & Kashmir)

Subject:- Royalty on China Clary.

Sir,

I am directed to refer to item 9 of schedule I to the Mineral Concession Rules, 1949, according to which royalty on China Clay is chargeable at the rate of 5% of its sale value at pit's mouth, It has been pointed out that the mineral has to pass through the various stages mentioned below before it is fit to be marketed, and an enquiry has been made as to how the pit's mouthvalue is to be arrived at:-

(i) Quarrying of Crude Clary.

(ii) Transporting the Crude to the Washing Plant.

(iii) Washing the Crude and allowing the Clay splution to settle in vats for removing sand and other foreign materials.

(iv) Pumping of the solution from the vatset to the Press machine.

(v) Taking the Pressed Clay to the furnace, where it is dried.

(vi) After drying the finished Clay is taken to the Store-room where it is bagged, weighed and transported to the reil-head.

I am to explain that if the clay is sold in Crude from after stage No.(1) the actual price received by the miner will be the pit's mouth value for purposes of calculatingthe royalty. If, however the clay is sold after all or any of the stages mentioned at (ii) to (vi) above, the cost of these processes should be deducted from the final sale value received for the clay and the royalty should be calculated on the amount thus arrived.

Yours faithfully,

Sd/...
(M. Malhotra) Asst.Secy to Govt. of India.
